ACADEMIC TEAM WORK / 2025

DECO2200 / INTERACTION DESIGN STUDIO / 2025 S2

One System, One Journey.

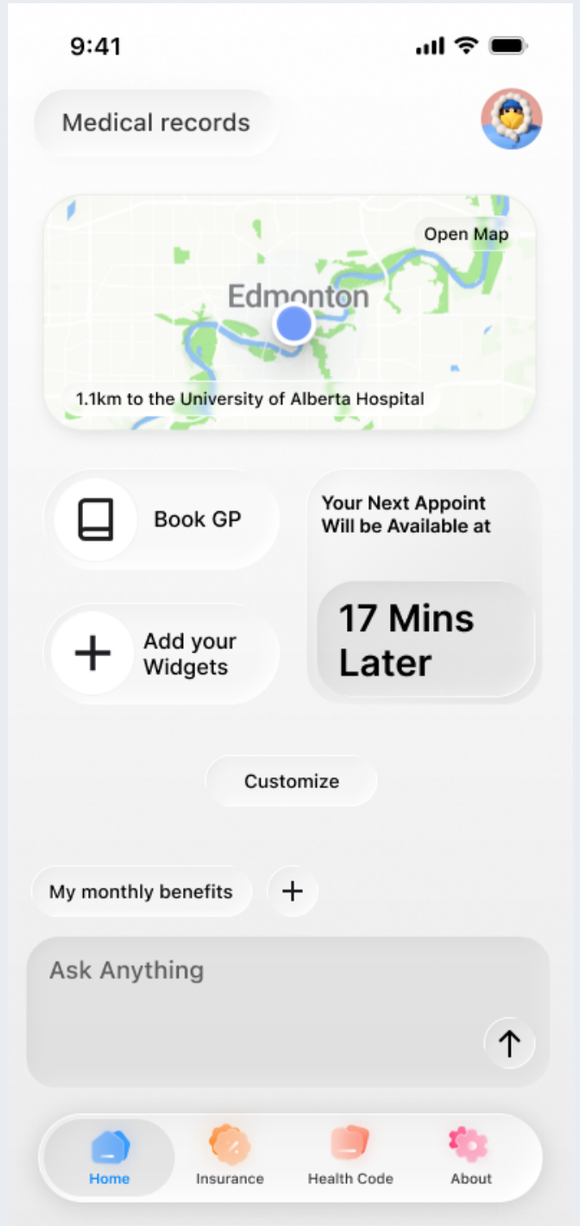

An omni-channel healthcare concept, shown through the team's original Figma screens.

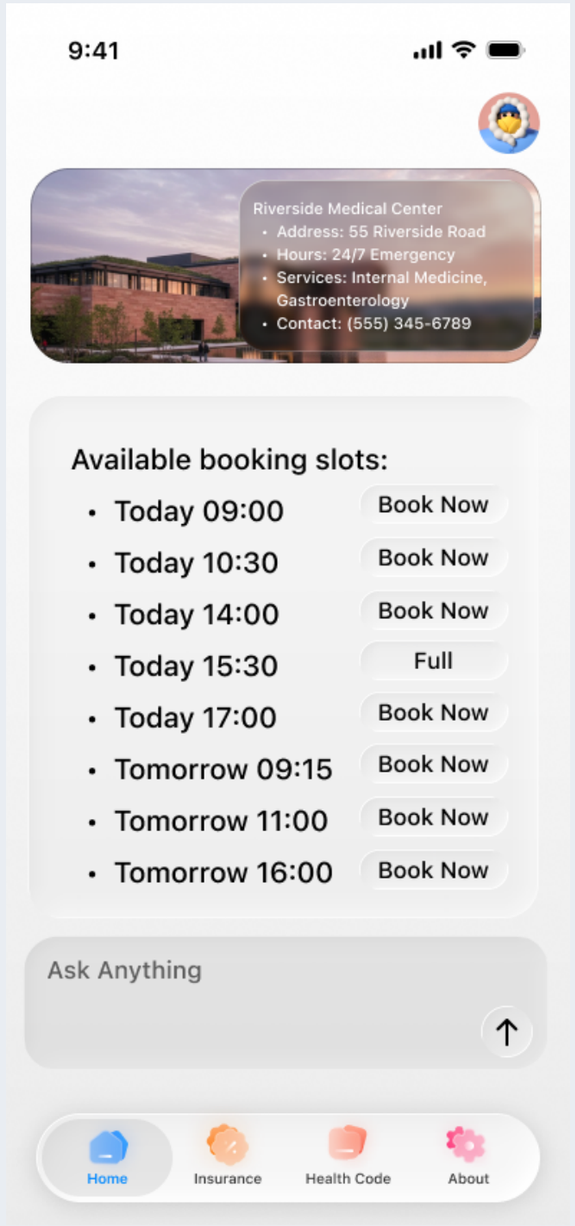

VISUAL STUDY

Soft surfaces, rounded panels and colourful icon accents organise the mobile experience.

MY CONTRIBUTION

I created the Figma interface design for this academic team project. Research and other project work were shared with teammates.

Original Figma exports • academic prototype, not a clinical service

TEAM PROJECT POSTER

Auraly: research to a design concept.

A team poster documenting the problem, concept, interface iterations, accessibility ideas and future work.

MY CONTRIBUTION IN CONTEXT

I created Figma interface designs within the academic team. Research and the project poster were team outcomes.

Participant and interface name labels, and QR patterns, are redacted for this portfolio. The complete poster is available as a separate PDF for closer reading.
